

Does a job in the Non-Profit sector, working with a small international team, in an open and unbiased culture tick your boxes? Join us as Full Stack PHP Developer!

**We are the WMDA,**

the World Marrow Donor Association headquartered in Leiden. Our goal is to make sure that each patient, worldwide, has equal access to high quality cells for transplantation from stem cell donors whose rights and safety are protected. We facilitate doctors in matching stem cell donors and patients. <https://wmda.info/about-us/what-we-do/>

**The Job – Full Stack PHP Developer**

Approximately 2/3 of your time is spent on Scrum based, Full Stack development renewing, extending and maintaining our application landscape. WMDA-IT is currently transitioning towards a cloud native environment with (Bus)DevOps using the latest technologies (PWA, serverless computing, no/low code solutions, CI/CD, Kubernetes). The remaining time is spent on innovation, professionalisation, support and maintenance (in a variety of programming languages). You participate in international projects from scoping, requirements gathering through implementation and standardisation which requires some international travel (2-4 times a year). We trust you take initiatives that help our growing organisation move forward, solve problems, take initiatives and give you a lot of freedom to do so.

**Working in our team**

We promote global collaboration and the sharing of best practices for our members (for example doctors, researchers, donor recruiters) and also stimulate ourselves, and you, to do the same. You will be challenged, trusted, be responsible and appreciated in our informal organisation. We will learn from you and you will learn from us.

**Are you the one? Apply now if you:**

- Have 4+ years of experience in designing, building and managing multiple complex applications, API's or microservices preferably using PostgreSQL and Full Stack PHP/Laravel development
- Want to take ownership of support problems and being proactive when dealing with issues
- Have some years of experience in JavaScript frameworks (Vue.js, Angular.js, Node.js), Web development and are familiar with Azure or AWS
- Know SOLID inside out, love architectural challenges and working SCRUM based
- Haven an excellent command of the English language
- Have a European work permit and live within a 70 kilometres radius of Leiden
- You are open to all cultures

**What else do we have to offer?**

The opportunity to work with people from all over the world, from participating member organisations, in project groups, being involved in the complete development process of software solutions. An office at 5 minutes walking distance of Leiden Central station. A lot of opportunity for growth, own initiative and fun in a growing organisation. Team membership of a small internal core team in the Netherlands (11 FTE) lots of interesting challenges to research and work on.

Please send your application and motivation to [HR@WMDA.info](mailto:HR@WMDA.info)

**Please note that acquisition is not appreciated. This vacancy is open to people with an EU-work permit only.**
