

Does a job in the Non-Profit sector, working with a small international team, in an open and unbiased culture tick your boxes? Join us as Full Stack Developer!

We are the WMDA

The World Marrow Donor Association is headquartered in Leiden. Our goal is to make sure that each patient, worldwide, has equal access to high quality cells for transplantation from stem cell donors whose rights and safety are protected. We facilitate doctors in matching stem cell donors and patients. <https://wmda.info/about-us/what-we-do/>

The Job – Full Stack Developer

Approximately 2/3rd of your time is spent on Scrum based, Full Stack development renewing, extending and maintaining our application landscape. WMDA-IT is currently transitioning towards a cloud native environment with (Bus)DevOps using the latest technologies (PWA, serverless computing, no/low code solutions, CI/CD, microservices). The remaining time is spent on innovation, professionalisation, support and maintenance (in a variety of programming languages). You participate in international projects from scoping, requirements gathering through implementation and standardisation which requires some international travel (depending on how COVID-19 develops, this can be 2-4 times a year). We trust you take initiatives that help our growing organisation move forward, solve problems, take initiatives and give you a lot of freedom to do so.

Working in our team

We promote global collaboration and the sharing of best practices for our members (for example doctors, researchers, donor recruiters) and also stimulate ourselves, and you, to do the same. You will be challenged, trusted, be responsible and appreciated in our informal organisation. We will learn from you and you will learn from us.

Are you the one? Click the “apply now” button and send us your CV and cover letter, if you:

- Have 4+ years of experience in designing, building and managing multiple complex applications, API's or microservices preferably using PostgreSQL and Full Stack PHP/Laravel or .NET Core, C# development
- Want to take ownership of support problems and being proactive when dealing with issues
- Have experience in JavaScript frameworks (Vue.js, Angular.js, Node.js), Web development, Python, knowledge of different databases (Oracle, PostgreSQL, MySQL), test automation, familiar with Azure and have an open mind on new technology.
- Know SOLID inside out, love architectural challenges, prefers test driven approach, working SCRUM based and enjoys translating user requirements into high quality coded solutions.
- Have an excellent command of the English language
- Have a European work permit and live (or want to relocate) within a 70 kilometres radius of Leiden
- You are open to all cultures

What else do we have to offer?

The opportunity to work with people from all over the world, from participating member organisations, in project groups, being involved in the complete development process of software solutions. An office at 5 minutes' walking distance of Leiden Central station. A lot of opportunity for growth, own initiative and fun in a growing organisation. Team membership of a small internal core team in the Netherlands (11 FTE) lots of interesting challenges to research and work on.

Please note that acquisition is not appreciated. This vacancy is open to people with an EU-work permit only.
