## EMERGENCY STEM CELL STORAGE DIRECTIONS

Page 1 of 1

Please complete this form detailing stem cell storage procedures in the event of national or international emergencies that may affect the timely transport of stem cell products. This may include, but is not limited to: catastrophic acts of nature, acts of war, and acts of terrorism. Storage methods such as cryopreservation will be discussed between both parties if the courier is prevented from travelling for more than 24 hours after final collection is completed. If possible, the transplant centre will be asked for final confirmation before such storage procedures are performed.

PATIENT DATA	
Patient first name:	Patient last name:
Patient registry:	
Transplant centre:	
Patient ID: (assigned by patient registry)	Patient ID: (assigned by donor registry)

DONOR DATA	
Donor registry:	ION:
Donor ID:	
GRID:	
Contact person:	
24 hour phone:	

TRANSPLANT PHYSICIAN'S PREFERENCE FOR EMERGENCY STEM CELL STORAGE		
Delay of:	Preferred storage method:	
24-48 hours:		
Greater than 48 hours:		
Contact person:
