***Discounts for Members:**

Upper Middle Income Countries: 20%

Lower Middle Income Countries: 33%

Low Income Countries: 50%

The World Bank categorises global economies into four income levels: low, lower-middle, upper-middle and high-income countries. These categories are determined based on each country's Gross National Income (GNI) per capita for the previous fiscal year, which is calculated from the country's Gross Domestic Product (GDP) plus net income of residents, converted to US dollars using the Atlas method.
